

# First Subsea Limited

## Environmental Policy

The company maintains that continual environmental conservation awareness is the responsibility of the management and employees at all levels.

To achieve this objective the company will, as far as reasonably practical, provide an environmental control system based upon the requirements of the international standard ISO 14001 – ENVIRONMENTAL MANAGEMENT SYSTEMS together with the HEALTH AND SAFETY AT WORK ACT so as to:

- Be aware of and continually assess the possible impact the company activity has on the environment and the general public.
- Provide and maintain safe working conditions for its employees.
- Provide and maintain appropriate controls for the reduction of waste materials and subsequent safe disposal using the services of 'approved suppliers'.
- Provide finance, procedures, training and equipment that it considers necessary to implement and maintain an effective environmental policy and deal with all perceived hazards.

A handwritten signature in blue ink that reads "B.K. Green".

Brian Green  
General Manager,
